

The Port Authority of NY & NJ

Title: Data Analyst (Performance Analyst)

Department: Tunnels, Bridges & Terminals (TB&T)

Location: 4 World Trade Center, New York, NY

Responsibilities:

The TB&T E-Z Pass Tolling Group is looking for a Data Analyst to join our growing team. The successful candidate will bring a thorough understanding of business analytics, front-end data reporting, and business intelligence tools to support actionable findings.

The selected candidate will report to the Data Analytics Manager.

The position is responsible for the following activities:

- Compile, validate, manage and analyze data that will be used to build various reports for the Tolling Group, Senior and Executive Management.
- Create and maintain a library of documentation on query and report designs.
- Compile data from various systems and perform quantitative and qualitative data analysis for internal and external requests.
- Present data findings in a clear manner so Management understands and can determine a course of action.

Qualifications:

Candidates must present the following qualifications to be considered eligible for this position:

- Must possess a bachelor's degree from an accredited college or university in Data Science, Computer Science, Statistics or a related field.
- Demonstrated knowledge of SQL, including SQL tuning and advanced SQL queries using Oracle.
- Experience in Business Intelligence.
- Experience creating Dashboards using various BI tools.
