

## Richard Mai

Richard Mai is a Senior Project Manager focusing on clean transportation with the New York State Energy Research and Development Authority (NYSERDA). In his current position he supports various electric vehicle, integrated mobility, and transportation planning programs and initiatives, including collaborating with private and public stakeholders to develop and demonstrate innovative technologies that will improve the efficiency of the transportation system in New York.

Prior to joining NYSERDA, Richard worked with the NY Metropolitan Transportation Authority to help develop their Capital Program and forecast long-term needs. Richard also worked with The Port Authority of NY & NJ to manage federal grants for the World Trade Center development and airport resiliency planning. Richard holds a Master of Public Administration in Environmental Science and Policy from Columbia University and a Bachelor of Science in Natural Resources from Cornell University.
