

Sue Thomas, PE, PMP, has managed projects for both high- and low-profile ventures. She has extensive experience in signal retiming, simulation modelling, traffic analysis, signal operations and emergency planning. She has been managing NYC traffic engineering projects under several multi-year agreements and has overseen the development of signal timing plans for many corridors throughout NYC. She has been active in ITS-NY since 2009. She got her graduate degree from the University of Sussex and her undergraduate degree from the University of Bath, in the U.K. She is a licensed professional engineer in 6 States and a certified PMP. She has been with KLD since 2001 and was appointed Vice President in 2016, then Chief Operating Officer in 2023.
